1 Plaintiff United States of America, on behalf of the United States Department of
2 Health & Human Services, alleges as follows:

3 **I. SUMMARY OF THE ACTION**

4 1. This is an action for treble damages and civil penalties under the False
5 Claims Act, 31 U.S.C. §§ 3729 – 3732, and damages under the common law.

6 2. Defendant Prime Healthcare Services, Inc. (Prime) is a privately held
7 company founded in California in 2001. Defendants to this action include Prime and 14
8 general acute-care hospitals that either Prime or its affiliate, the Prime Healthcare
9 Foundation (Foundation), own and operate in communities throughout California.
10 Defendant Prem Reddy, M.D., is the founder, Chairman, President, and Chief Executive
11 Officer of Prime (Reddy).

12 3. Prime’s business model is to buy distressed hospitals and make them
13 profitable. Prime tells the public that it accomplishes these turnarounds by “investing
14 tens of millions of dollars on capital improvements . . . , maintaining emergency
15 departments . . . that are open and accessible to all members of the community, including
16 the uninsured and indigent, [and] implementing, with the support and assistance of the
17 independent medical staff, proven clinical protocols which improve the quality of care
18 received by all patients.”

19 4. But from 2006 through September 30, 2013, Defendants engaged in a
20 systematic practice of maximizing revenues by, among other things, inducing physicians
21 who work at Prime hospitals to increase the number of inpatient care admissions of
22 Medicare beneficiaries who visit the Emergency Department (ED) at a Prime hospital,
23 without regard to whether inpatient admission is medically necessary.

24 5. Inpatient care generally refers to any medical service that requires
25 admission into a hospital and tends to be directed towards more serious ailments and
26 trauma that require one or more days of overnight stay at a hospital.

27 ///

1 6. In order to be payable by Medicare, an item or service must be “reasonable
2 and necessary” in accordance with federal law and Medicare policy. If a hospital
3 inpatient admission is not reasonable and necessary, then the admission is not payable
4 under Medicare Part A. For example, if a beneficiary could appropriately be treated in
5 the ED on an outpatient basis, then the inpatient admission is neither reasonable and
6 necessary nor payable under Medicare Part A.

7 7. Observation services are appropriate when a Medicare beneficiary presents
8 to the ED with symptoms whose treatment or monitoring requires more time to assess
9 than the typical ED visit. Observation is used to help the physician decide whether the
10 patient needs to be admitted or can be discharged. Medicare reimburses for observation
11 services as outpatient services, even if the patient stays in the hospital overnight. As
12 with inpatient admission, observation services must be reasonable and necessary for
13 treatment of the patient’s medical condition in order to be reimbursed by Medicare.

14 8. When a Prime hospital admits a beneficiary as an inpatient who should have
15 received the same treatment at a lower level of care, Medicare pays Prime approximately
16 three to four times the reimbursement amount the hospital would have received had it
17 billed for the services rendered to the beneficiary at the appropriate level of care.

18 9. When a Prime hospital admits a beneficiary as an inpatient when admission
19 was not medically necessary, and provides medically unnecessary inpatient services,
20 Medicare pays for care that was not reasonable and necessary and, therefore, not eligible
21 for reimbursement.

22 10. More than 50 million people are enrolled in Medicare. There are 4,700
23 inpatient hospital facilities enrolled as Medicare providers. In 2012, Medicare paid
24 hospitals \$119 billion for inpatient services and \$46 billion for outpatient services.
25 MedPAC Report to the Congress: Medicare Payment Policy, March 2015, p. 53, Table
26 3-1. The sheer magnitude of the Medicare program requires Medicare to trust hospitals
27 and doctors to prioritize the needs and well-being of beneficiaries, rather than their own
28

1 financial self-interest, in making treatment decisions, including decisions regarding
2 inpatient admission versus hospital outpatient treatment.

3 11. Prime's management, led by Reddy, developed and implemented practices
4 and procedures that violate that trust and instead induce ED doctors to admit Medicare
5 beneficiaries as inpatients whose signs, symptoms and treatment needs should have been
6 appropriately managed as outpatients receiving observation services or even in the ED.

7 12. These practices and procedures include:

- 8 (a) Removing "observation" as an option from the admission forms
9 utilized by emergency room physicians and that had previously been
10 used at hospitals prior to their acquisition by Prime;
- 11 (b) Imposing quotas and goals for admission of patients from the ED
12 and, specifically, of Medicare beneficiaries;
- 13 (c) Deploying CEOs of hospitals, Chief Medical Officers and ED
14 Medical Directors to question individual ED physicians regarding
15 their decision to discharge specific patients and threaten that they
16 would find themselves "off the schedule" if they did not increase
17 their rate of admissions;
- 18 (d) Telling ED physicians that any insured patient expected to be in the
19 ED for more than two hours should be admitted as an inpatient, while
20 an uninsured patient may be kept in the ED for many hours and then
21 discharged;
- 22 (e) Supplying unwitting Prime physicians with versions of admission
23 criteria that are published by a third party and relied upon in hospitals
24 nationwide that Prime had altered to make more permissive of
25 inpatient admission but which Prime represented as the original
26 criteria.

27 ///

1 13. Some Prime physicians and staff members protested these practices and
2 procedures and then quit or had their positions terminated by Defendants. Others
3 acquiesced to protect their livelihoods.

4 14. As a result of these practices and procedures, Defendants have claimed and
5 received millions of dollars in inflated reimbursements for medically unnecessary
6 inpatient admissions. In so doing, Defendants have burdened the finite resources of the
7 Medicare program and put their own pecuniary interests ahead of the interests of
8 Medicare.

9 **II. JURISDICTION AND VENUE**

10 15. This Court has subject matter jurisdiction over this action pursuant to 28
11 U.S.C. § 1345 because the United States is the Plaintiff. In addition, the Court has
12 subject matter jurisdiction over the FCA cause of action under 28 U.S.C. § 1331 and
13 supplemental jurisdiction to entertain the common law and equitable causes of action
14 under 28 U.S.C. §1367(a).

15 16. This Court has personal jurisdiction over Defendants pursuant to 31 U.S.C.
16 § 3732(a) because at least one of the Defendants can be found in, resides in, transacts
17 business in and has committed the alleged acts in the Central District of California.

18 17. Venue is proper in this District pursuant to 28 U.S.C. § 1391(b)-(c) and 31
19 U.S.C. § 3732(a) because at least one of the Defendants can be found in, resides in and
20 transacts business in the Central District of California, and many of the alleged acts
21 occurred in this District.

22 **III. PARTIES**

23 18. Plaintiff in this action is the United States of America, suing on behalf of
24 the United States Department of Health & Human Services (“HHS”) and, specifically, its
25 operating division, the Centers for Medicare & Medicaid Services (“CMS”). At all times
26 relevant to this Complaint, CMS was an operating division of HHS that administered and
27 supervised the Medicare program.

1 19. The *qui tam* plaintiff (“Relator”) is Karin Berntsen, a registered nurse who
2 was employed at Defendant Alvarado Hospital when Prime acquired it in November
3 2010. Relator remains employed there and has served as the Director of Quality and
4 Risk Management, the Director of Case Management, and most recently as the Director
5 of Performance Improvement. Relator initiated this action by filing a complaint against
6 Defendants, among others, under the *qui tam* provisions of the False Claims Act, 31
7 U.S.C. §3730(b)(1).

8 20. At all times mentioned herein, defendant Prime was and now is a Delaware
9 for-profit corporation with its principal place of business in Ontario, California. Prime
10 was founded in 2001 by Reddy, a cardiologist by training who is primarily responsible
11 for directing the activities of Prime, its subsidiaries and its affiliated entities. The
12 Foundation is an entity affiliated with Prime. Prime has transferred ownership to the
13 Foundation of certain hospitals that were owned by Prime. The Foundation currently
14 owns and operates four acute care hospitals in California that are part of the Prime
15 hospital chain and controlled by Prime. Through wholly-owned subsidiaries, Prime or
16 the Foundation now own or operate the fourteen Defendant Hospitals in the state of
17 California. The fourteen Defendant Hospitals, their operating entities, principal places
18 of business, and acquisition dates are as follows:

- 19 (a) Desert Valley Hospital, operated by Desert Valley Hospital, Inc.,
20 located at 16850 Bear Valley Road, Victorville, California, and
21 acquired by Prime on or about January 1, 2001;
- 22 (b) Chino Valley Medical Center, operated by Veritas Health Services,
23 Inc., located at 5451 Walnut Avenue, Chino, California, and acquired
24 by Prime on or about November 1, 2004;
- 25 (c) Sherman Oaks Hospital, Prime HealthCare Services - Sherman Oaks,
26 LLC, located at 4929 Van Nuys Boulevard, Sherman Oaks,
27 California, owned and operated by the Foundation, and acquired by
28

1 Prime on or about February 1, 2006 and donated to the Foundation on
2 or about January 1, 2012;

3 (d) Paradise Valley Hospital, operated by Prime Healthcare Paradise
4 Valley, located at 2400 East 4th Street in National City, California,
5 and acquired by Prime on or about March 1, 2006;

6 (e) Montclair Hospital Medical Center, Prime HealthCare Services -
7 Montclair, LLC, located at 5000 San Bernardino Street, Montclair,
8 California, owned and operated by the Foundation and acquired by
9 Prime on or about July 1, 2006, and donated to the Foundation on or
10 about December 31, 2010;

11 (f) Huntington Beach Hospital, Prime Healthcare Huntington Beach,
12 LLC, located at 17772 Beach Boulevard, Huntington Beach,
13 California, owned and operated by the Foundation, and originally
14 acquired by Prime on or about September 30, 2006 and donated to the
15 Foundation on or about January 1, 2013;

16 (g) West Anaheim Medical Center, operated by Prime Healthcare
17 Anaheim, LLC, located at 3033 West Orange Avenue, Anaheim,
18 California, and acquired by Prime on or about September 30, 2006;

19 (h) La Palma Intercommunity Hospital, operated by Prime Healthcare La
20 Palma, LLC, located at 7901 Walker Street, La Palma, California,
21 and acquired by Prime on or about September 30, 2006, and donated
22 to the Foundation on or about January 2015;

23 (i) Centinela Hospital Medical Center, operated by Prime Healthcare
24 Centinela, LLC, located at 555 East Hardy Street, Inglewood, CA,
25 and acquired by Prime on or about October 31, 2007;

26 (j) Garden Grove Medical Center, operated by Prime HealthCare
27 Services-Garden Grove, LLC, located at 12601 Garden Grove
28

1 Boulevard, Garden Grove, California, and acquired by Prime on or
2 about June 1, 2008;

3 (k) San Dimas Community Hospital, operated by Prime Health Services -
4 San Dimas, located at 1350 West Covina Boulevard, San Dimas,
5 California, and acquired by Prime on or about June 1, 2008;

6 (l) Encino Hospital Medical Center, Prime Healthcare Services, LLC,
7 located at 16237 Ventura Boulevard, Encino, California, owned and
8 operated by the Foundation and originally acquired by Prime on or
9 about June 1, 2008 and donated to the Foundation in 2009;

10 (m) Shasta Regional Medical Center, operated by Shasta Regional
11 Medical Center, LLC, located at 1100 Butte Street, Redding,
12 California, and acquired by Prime on or about October 31, 2008; and

13 (n) Alvarado Community Hospital, operated by Alvarado Hospital, LLC,
14 located at 6655 Alvarado Road, San Diego, California, and acquired
15 by Prime on or about November 17, 2010.

16 21. Defendant Reddy, Prime's founder, Chairman, President, and Chief
17 Executive Officer, has his primary residence at 14868 Riverside Drive, Apple Valley,
18 California 92307-4821, in San Bernardino County, and has his principal place of
19 business at Prime's corporate headquarters located at 3300 East Guasti Road, Ontario,
20 California 91761.

21 **IV. THE LAW**

22 **The False Claims Act**

23 22. The False Claims Act, 31 U.S.C. §§ 3729-3733 (FCA), provides for the
24 award of treble damages and civil penalties for, *inter alia*, knowingly causing the
25 submission of false or fraudulent claims for payment to the United States Government.

26 23. The FCA provides, in pertinent part:

27 (a) LIABILITY FOR CERTAIN ACTS.—
28

1 (1) IN GENERAL.—Subject to paragraph (2), any person
2 who—

3 (A) knowingly presents, or causes to be presented, a false
4 or fraudulent claim for payment or approval;

5 (B) knowingly makes, uses, or causes to be made or used,
6 a false record or statement material to a false or
7 fraudulent claim; . . . or

8 (G) knowingly makes, uses, or causes to be made or
9 used, a false record or statement material to an obligation
10 to pay or transmit money or property to the Government,
11 or knowingly conceals or knowingly and improperly
12 avoids or decreases an obligation to pay to transmit
13 money or property to the Government ,

14 is liable to the United States Government for a civil
15 penalty of not less than \$5,000 and not more than
16 \$10,000, as adjusted by the Federal Civil Penalties
17 Inflation Adjustment Act of 1990 (28 U.S.C. 2461 note;
18 Public Law 104-410), plus 3 times the amount of
19 damages which the Government sustains because of the
20 act of that person.

* * *

21 (b) DEFINITIONS.—For purposes of this section—

22 (1) the terms “knowingly” and “knowingly”—

23 (A) mean that a person, with respect to information—

24 (i) has actual knowledge of the information;

25 (ii) acts in deliberate ignorance of the truth or falsity
26 of the information; or

27 (iii) acts in reckless disregard of the truth or falsity of
28 the information; and

(B) require no proof of specific intent to defraud

31 U.S.C. § 3729 (as amended May 20, 2009).

24. Prior to amendments to the FCA pursuant to Public Law 1111-21, the Fraud
Enforcement and Recovery Act (FERA), effective May 20, 2009, the FCA provided, in
pertinent part:

(a) Any person who—

(1) knowingly presents, or causes to be presented, to an
officer or employee of the United States Government or a
member of the Armed Forces of the United States a false or
fraudulent claim for payment or approval;

1 (2) knowingly makes, uses, or causes to be made or used, a
2 false record or statement to get a false or fraudulent claim
paid or approved by the Government; . . . or

3 (7) knowingly makes, uses, or causes to be made or used, a
4 false record or statement to conceal, avoid, or decrease an
5 obligation to pay or transmit money or property to the
Government,

6 is liable to the United States Government for a civil penalty
7 of not less than \$5,000 and not more than \$10,000, plus
three times the amount of damages which the Government
sustains because of the act of that person

8 * * *

9 (b) KNOWING AND KNOWINGLY DEFINED.—For purposes of this
10 section, the terms “knowing” and “knowingly” mean that a
person, with respect to information—

11 (1) has actual knowledge of the information;

12 (2) acts in deliberate ignorance of the truth or falsity of the
information; or

13 (3) acts in reckless disregard of the truth or falsity of the
14 information, and no proof of specific intent to defraud is
required.

15 31 U.S.C. § 3729 (as amended October 27, 1986).

16 25. Section 4(f) of FERA provides that the 2009 amendments to the FCA “shall
17 take effect on the date of enactment of this Act and shall apply to conduct on or after the
18 date of enactment, except that . . . subparagraph (B) of section 3729(a)(1) of title 31,
19 United States Code, as added by subsection (a)(1), shall take effect as if enacted on June
20 7, 2008, and apply to all claims under the False Claims Act (31 U.S.C. 3729 *et seq.*) that
21 are pending on or after that date”

22 26. Pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, as
23 amended by the Debt Collection Improvement Act of 1996, 28 U.S.C. § 2461 (notes),
24 and 64 Fed. Reg. 47099, *47103 (1999), the civil penalties were adjusted to \$5,500 to
25 \$11,000 for violations occurring on or after September 29, 1999.

26 ///

27 ///

1 31. To participate in the Medicare program, health care providers enter into
2 provider agreements with the Secretary of HHS. 42 U.S.C. § 1395cc. The provider
3 agreement requires the provider to agree to conform to all applicable statutory and
4 regulatory requirements for reimbursement from Medicare, including the provisions of
5 Section 1862 of the Social Security Act and Title 42 of the Code of Federal Regulations.
6 As part of that agreement, the provider must sign the following certification:

7 I agree to abide by the Medicare laws, regulations and program instructions
8 that apply to [me]. The Medicare laws, regulations, and program
9 instructions are available through the [Medicare] contractor. I understand
10 that payment of a claim by Medicare is conditioned upon the claim and the
11 underlying transaction complying with such laws, regulations, and program
12 instructions (including, but not limited to, the Federal anti-kickback statute
13 and the Stark law), and on the [provider's] compliance with all applicable
14 conditions of participation in Medicare.

15 Form CMS-855A; Form CMS-8551.

16 32. Among the legal obligations of participating providers is the requirement
17 not to make false statements or misrepresentations of material facts concerning payment
18 requests. *See* 42 U.S.C. § 1320a-7b(a)(1)-(2); 42 C.F.R. §§ 1320a-7b(a)(1)-(2),
19 413.24(f)(4)(iv).

20 33. Medicare reimburses only services that are “reasonable and necessary for
21 the diagnosis or treatment of illness or injury” 42 U.S.C. § 1395y(a)(1)(A). In
22 submitting claims for payment to Medicare, providers must certify that the information
23 on the claim form presents an accurate description of the services rendered and that the
24 services were reasonably and medically necessary for the patient.

25 34. Federal law provides that it is the obligation of the provider of health care
26 services to ensure that services provided to Medicare beneficiaries are “provided
27 economically and only when, and to the extent, medically necessary[,]” and are
28 “[s]upported by evidence of medical necessity.” 42 U.S.C. § 1320c-5(a)(1), (3).

 35. Acute care hospital inpatient services are reimbursed under the Inpatient
Prospective Payment System (“IPPS”) by Medicare Part A. This is a system developed

1 for Medicare to classify inpatient hospital cases into one of 538 Diagnostic Related
2 Groups (“DRGs”), which were expected to have similar hospital resource use. DRGs
3 have been used since 1983 to determine how much Medicare pays the hospital, since
4 patients within each category are similar clinically and are expected to consume a similar
5 level of hospital resources. A payment rate is established for each DRG. In 2007,
6 Medicare adopted a refinement of the DRG system, called the Medicare Severity DRGs
7 (MS-DRGs), which expanded the number of DRGs to 745 and made other refinements.
8 Hereafter, DRGs and MS-DRGs will be collectively referred to as DRGs for clarity.

9 36. Hospital outpatient services, including care rendered in a hospital ED, or
10 when a beneficiary receives “observation” services, are reimbursed under the hospital
11 Outpatient Prospective Payment System (OPPS) by Medicare Part B. All outpatient
12 services are classified into groups called Ambulatory Payment Classifications (APCs).
13 Services in each APC are similar clinically and in terms of the resources that they
14 require. A payment rate is established for each APC. Depending on the services
15 provided, hospitals may be paid for more than one APC per patient encounter.

16 37. Medicare classifies observation services as a type of hospital outpatient
17 care. Observation services help the physician determine the cause of a patient’s
18 symptoms in order to decide if the patient needs to be admitted as an inpatient or can be
19 discharged. Typically observation services are ordered for patients who present to the
20 ED and who require a significant period of treatment or monitoring in order to inform a
21 decision by physicians concerning their admission or discharge. Observation services
22 include short term treatment, assessment, and reassessment provided while a decision is
23 being made about discharge or admission. A patient may receive observation services in
24 an ED, a dedicated observation unit, or in any bed in the hospital. A patient receiving
25 observation services receives all nursing, medical care, diagnostic tests (*e.g.*, laboratory
26 tests, x-rays and other radiological tests), therapy, and prescriptions ordered by her
27 physician, as well as a bed and food for the duration of her stay. Medicare expects that a
28

1 decision whether to discharge a patient receiving observation services or admit her as an
2 inpatient will occur in less than 48 hours, and usually in less than 24 hours. *See* CMS
3 Publication 100-02, Medicare Benefit Policy Manual, Ch. 6, § 20.6 (Rev. 189).

4 38. At all times pertinent to this complaint, observation services were billed as a
5 time-based service, with the minimum period of observation that was reimbursable being
6 eight hours. From January 1, 2006 through December 31, 2007, Medicare reimbursed
7 hospitals a separate APC payment for outpatient observation services involving three
8 specific conditions: chest pain, asthma, and congestive heart failure. Payments for
9 observation services provided to beneficiaries with other conditions were packaged into
10 the payments for those patients' ED visits. *See* CMS Publication 100-04, Medicare
11 Claims Processing Manual, Ch. 4, §§ 290.1, 290.4.3. (Rev. 787).

12 39. On January 1, 2008, Medicare removed the limitation of diagnoses eligible
13 for an additional payment for observation. Since 2008, hospitals may bill a composite
14 APC for extended assessment and management of any patient who receives observation
15 services for eight or more hours who had an ED visit the day that observation services
16 began or the previous day. *See* CMS Publication 100-04, Medicare Claims Processing
17 Manual, Ch. 4 § 290.5.1 (Rev. 787).

18 40. Medicare reimburses hospitals for surgical procedures on either an inpatient
19 or an outpatient basis, depending on whether the patient has been formally admitted as
20 an inpatient (and subject to medical necessity review). Medicare designates certain
21 procedures as payable only when performed on an inpatient basis. Medicare's rationale
22 for designating certain procedures as "inpatient only" is that either the nature of the
23 procedure, the typical underlying physical condition of patients who require the
24 procedure, or the need for at least 24 hours of postoperative recovery time or monitoring
25 before the patient can be safely discharged dictates that Medicare payment is appropriate
26 only if the service is furnished on an inpatient basis. *See* CMS Publication 100-04,
27 Medicare Claims Processing Manual, Ch. 4 §180.7 (Rev. 787). These procedures are
28

1 called “inpatient only” procedures. CMS publishes a list of “inpatient only” procedures
2 annually. All other Medicare-covered procedures may be provided - and paid by
3 Medicare - on either an inpatient or an outpatient basis, depending upon the individual
4 patient’s clinical condition and reaction to the surgery, including any complications that
5 occur. An individualized assessment of the patient’s condition must be made instead of
6 routinely admitting all patients who have a certain procedure not listed on the inpatient
7 only list.

8 41. Medicare guidance directs hospitals to not bill for routine observation
9 following all outpatient surgery, as a period of postoperative monitoring during a
10 standard recovery period (e.g., 4-6 hours) is included in Medicare reimbursement for
11 outpatient surgery. *See* CMS Publication 100-04, Medicare Claims Processing Manual,
12 Ch. 4 §290.2.2 (Rev. 787).

13 42. The Medicare Program Integrity Manual instructs FIs and MACs that in
14 order for a claim for inpatient care to be payable:

15 Review of the medical record must indicate that inpatient hospital care was
16 medically necessary, reasonable, and appropriate for the diagnosis and
17 condition of the beneficiary at any time during the stay. The beneficiary
18 must demonstrate signs and/or symptoms severe enough to warrant the need
19 for medical care and must receive services of such intensity that they can be
20 furnished safely and effectively only on an inpatient basis.

19 CMS Publication 100-08, Medicare Program Integrity Manual, Ch. 6 § 6.5.2 (Rev.
20 656).

21 43. Medicare defines an inpatient as a person who has been formally admitted
22 to a hospital by a physician for the purpose of receiving inpatient services. CMS
23 Publication 100-02, Medicare Benefit Policy Manual, Ch. 1, § 10 (Rev. 189).

24 44. The physician decides whether to admit the patient as an inpatient and, if so,
25 when to do so. The Medicare guidance in effect during the time period at issue in this
26 complaint advised physicians to “use a 24-hour period as a benchmark, i.e., they should
27
28

1 order admission for patients who are expected to need hospital care for 24 hours or more,
2 and treat other patients on an outpatient basis.” *Id.*

3 45. CMS recognizes that the decision whether to admit a patient is made by the
4 physician who should consider a number of relevant factors, including the patient’s
5 medical history, current medical needs,

- 6 “The severity of the signs and symptoms exhibited by the patient;
- 7 “The medical predictability of something adverse happening to the patient;
- 8 “The need for diagnostic studies that appropriately are outpatient services
(i.e., their performance does not ordinarily require the patient to
9 remain at the hospital for 24 hour or more) to assist in assessing
whether the patient should be admitted; and
- 10 “The availability of diagnostic procedures at the time when and the location
where the patient presents.”

11 *Id.*

12 46. Additionally, the Manual provides guidance regarding the proper
13 classification of patients having minor surgeries or other treatments, as follows:

14 “**Minor Surgery or Other Treatment** – When patients with known diagnoses
15 enter a hospital for a specific minor surgical procedure or other treatment that is
16 expected to keep them in the hospital for only a few hours (less than 24), they are
considered **outpatients** for coverage purposes regardless of the hour they came to
the hospital, whether they used a bed, and whether they remained in the hospital
past midnight.”

17 *Id.*

18 47. Following the discharge of a Medicare beneficiary from a hospital, the
19 hospital submits a patient-specific claim for interim reimbursement for items and
20 services furnished to the beneficiary during his or her hospital stay. 42 C.F.R. §§413.1,
21 413.60, 413.64. Hospitals submit claims on Form CMS-1450, also called Form UB-04.
22 Claims for inpatient services are submitted to Medicare Part A. Claims for observation
23 and other outpatient services, including ED visits and outpatient surgery, are submitted
to Medicare Part B.

27 ///

1 **VI. FACTUAL ALLEGATIONS**

2 **A. Defendants Adopted Policies and Practices Designed to Increase**
3 **Inpatient Admissions Without Regard to Medical Necessity.**

4 48. Reddy, Prime and the Defendant Hospitals acted with actual knowledge,
5 deliberate ignorance or reckless disregard of the laws, regulations and guidance
6 applicable to the federal healthcare programs by developing and implementing a
7 business model premised on policies and practices designed to increase inpatient
8 admissions of Medicare beneficiaries to Defendant Hospitals without regard to medical
9 need. These policies and practices were adopted for Defendants' financial gain rather
10 than clinical reasons and included: 1) discouraging the use of, or even eliminating,
11 observation services; 2) setting aggressive quotas to pressure ED physicians to admit
12 more patients; 3) criticizing and penalizing ED physicians who did not fall in line with
13 the Prime business model; and 4) misrepresenting Prime's admission criteria forms as
14 industry-accepted Milliman Care Guidelines. Prime's policies and procedures led to the
15 submission of false or fraudulent claims for inpatient medical services.

16 49. Prime's strategy was evident in Reddy's insistence that Prime physicians
17 and staff consider the insurance status of a patient when deciding whether or not to
18 admit, which prioritized the financial goals of Prime over the clinical needs of the
19 patient. In November 2008, for example, during a meeting with ED physicians, Reddy
20 directed physicians to consider a patient's insurance information before providing
21 services. On other occasions, Reddy instructed ED physicians to consider whether a
22 patient was a Medicare or Medi-Cal beneficiary before deciding which services the
23 hospital would provide.

24 ///

25 ///

26 ///

27 ///

1 **1. Defendants Implemented a “No Observation” Policy.**

2 *a. Prime Sought to Prevent the Use of Observation Services*
3 *Because the Reimbursement Is Less Than It Would Be For*
4 *Providing the Same Services to an Inpatient.*

5 50. Prime, acting through Reddy and others, acted purposefully to eliminate the
6 use of observation at Defendant Hospitals.

7 51. For example, upon acquiring a hospital, Prime, acting through Reddy and
8 others, would inform physicians and staff that the hospital would no longer use
9 observation for Medicare beneficiaries or other insured patients. The purpose of this
10 policy was to increase admissions by turning ED patients into inpatients when they
11 should have been treated right there and released or provided observation services.
12 Prime repeatedly told hospital executives, physicians, nursing supervisors, case
13 managers, clinical documentation specialists and other staff that the Defendant Hospitals
14 did not provide observation services, and that patients for whom such services should
15 have been appropriate were to be made inpatients.

16 52. Upon acquisition, Prime also replaced existing order forms used by both ED
17 and attending physicians with standard order forms used in all Prime hospitals. Prime’s
18 order forms did not provide a check box option for observation services and had the
19 effect of discouraging physicians from ordering observation for patients in circumstances
20 where they otherwise would have. On one occasion, when Reddy discovered that order
21 forms were still in use that included a check box for observation, he directed that the
22 option for observation be immediately removed.

23 53. As is generally the case at hospitals in the United States, Prime ED
24 physicians did not have admitting privileges or had limited privileges. ED physicians at
25 the Defendant Hospitals usually had to contact an attending physician or hospitalist - a
26 doctor specializing in the care of hospitalized patients - who would admit the patient.
27 Within a short period of time after Prime acquired a hospital, most admissions from the
28

1 ED were made by hospitalists working under contract to Defendants. Defendants
2 pressured the hospitalists to accept all admission recommendations from ED physicians,
3 instead of requiring that a patient be placed in observation to determine whether an
4 inpatient admission was necessary.

5 54. The “no observation” policy was communicated to ED physicians and
6 hospitalists in meetings with Reddy and other Prime executives and employees, via
7 multiple separate conversations with Reddy and other Prime executives, and through
8 transmission of this information from ED and hospitalist Medical Directors to individual
9 ED physicians and hospitalists.

10 55. At Garden Grove Hospital, for example, Reddy instructed physicians not to
11 use observation because, according to Reddy, the hospital was not licensed for
12 observation beds. Reddy told them this despite knowing, as did others at Prime, that
13 observation services can be provided in any duly licensed hospital bed: a dedicated
14 observation bed is not required by Medicare.

15 56. And when Prime acquired Alvarado Hospital, Relator Berntsen was the
16 Director of Case Management. Case managers are nurses who, among other things,
17 review patient medical records to assist physicians and hospitals with determining
18 whether inpatient admission or outpatient/observation services are appropriate. Relator
19 raised concerns to management at Alvarado Hospital about the marked decrease in use of
20 observation services at Alvarado that followed Prime’s acquisition of the hospital. She
21 was told by Prime executives that she and her case managers should no longer review
22 Medicare admissions to assess whether the patients met inpatient criteria.

23 57. Another example of the implementation of Prime’s “no observation” policy
24 is a July 6, 2012, meeting of case managers from multiple Prime hospitals. There, Ajith
25 Kumar, Prime’s Vice President of Reimbursement, claimed that Prime hospitals can
26 provide observation services but do not provide them to Medicare beneficiaries because
27 all, or almost all, Medicare beneficiaries satisfy the criteria for inpatient admission.

1 *b. Prime Directed ER Physicians to Admit Insured Patients If*
2 *They Would Be In the ER More Than Two Hours.*

3 58. The “no observation” policy went hand-in-hand with a policy of directing
4 ED physicians to admit insured patients from the ED if their evaluation or treatment
5 would take longer than two hours.

6 59. The two-hour rule or guideline applied only to insured patients. ED
7 physicians were told to keep uninsured patients in the ED far longer in an effort to avoid
8 the cost to the hospital of an uninsured inpatient admission.

9 60. In telling ED physicians that Prime does not provide observation services
10 and instructing them that insured patients should be admitted as inpatients after only two
11 hours, Prime encroached upon the physicians’ medical judgment and discretion about
12 how to treat patients and caused medically unnecessary admissions.

13 *c. The “No Observation” Policy Worked: Billings to Medicare*
14 *Plummeted After Prime Acquired a Hospital.*

15 61. Medicare claims statistics show a dramatic before-and-after shift in billings
16 for observation services at hospitals Prime acquired.

17 62. As noted above, observation services were billed as a time-based service.
18 Over and over, after Prime acquired a hospital, that hospital’s billings to Medicare for
19 observation service hours dropped, quarter to quarter, by hundreds or even thousands of
20 hours. At many hospitals, including but not limited to, La Palma Intercommunity
21 Hospital, Garden Grove Medical Center, Paradise Valley Hospital, West Anaheim
22 Medical Center, and Huntington Beach Hospital, billings for observation service hours
23 plummeted to almost zero.

24 63. The decreases in billings for observation hours were matched by increases
25 in claims for inpatient admissions relative to the hospitals’ historical statistics.

26 ///

27 ///

1 **2. Defendants Set Aggressive Quotas for Inpatient Admissions of**
2 **Insured Patients, Including Medicare Beneficiaries.**

3 64. Beginning in or before 2007, Reddy and Prime introduced arbitrary
4 admission benchmarks or quotas that Defendant Hospitals should admit as inpatients 20
5 to 30% of the insured patients who presented to the ED. The setting of such a target
6 violates a fundamental principle of the Medicare program: namely, that treatment
7 decisions, including the decision to admit inpatients, should be based upon beneficiaries'
8 clinical needs and that only services that are reasonable and medically necessary to meet
9 those needs are reimbursable by Medicare.

10 65. Reddy, Prime and the Defendant Hospitals knew that setting an arbitrary
11 quota for the percentage of ED patients that should be admitted as inpatients would
12 result in medically unnecessary admissions of Medicare beneficiaries. And Prime's
13 quota had a discernable effect on the admission practices at Defendant Hospitals.
14 Inpatient admissions of Medicare beneficiaries increased dramatically after Prime
15 acquired a hospital and instituted a 20 to 30% admission quota. Prime's admission
16 quotas caused the Defendant Hospitals to seek Medicare Part A reimbursements for
17 inpatient admissions where the necessary services should have been provided as
18 observation services.

19 66. In addition to causing the Medicare program to pay millions of dollars for
20 unnecessary inpatient stays, these unnecessary admissions needlessly exposed Medicare
21 beneficiaries to the dangers inherent in any hospital stay, including but not limited to
22 medical errors and hospital-acquired infections.

23 *a. Reddy Personally Communicated the Quotas to ED Physicians,*
24 *and They Got the Message.*

25 67. Shortly after Prime acquired a new hospital, Reddy routinely scheduled
26 mandatory meetings in order to "educate" ED physicians about Prime's new ED policies
27 and procedures.

1 68. During these initial meetings, Reddy delivered the same edict to all
2 physicians: increase inpatient admissions of insured patients to 20 to 30% of the ED
3 census and cut back on admissions of the uninsured to under 5% of the ED census.

4 69. At these meetings, Reddy routinely and specifically discussed with ED
5 physicians the higher Medicare reimbursements associated with an inpatient admission
6 in comparison to treatment in the ED or observation services for the same condition.
7 Physicians who attended these meetings with Reddy believed that his intention was to
8 pressure ED physicians to alter their clinical judgment in favor of admitting Medicare
9 beneficiaries to the hospital to increase Medicare reimbursements to Prime.

10 70. Reddy's message to admit Medicare beneficiaries was received, loud and
11 clear, by Prime physicians. For example, an ED Director at Encino Hospital jokingly
12 commented to other ED Directors in an email that he was "getting a little worried that
13 the average age of my docs at Encino is just about Medicare range. If I'm truly
14 following the Prime model, I should be admitting all simply for setting foot in the ED."

15 71. Reddy knew it was improper to apply pressure to admit. In or around late
16 2008, after Prime acquired Defendant Shasta Regional Medical Center, Reddy met with
17 ED physicians there and told them that Shasta's historical rate of admitting 17-18% of
18 ED patients was not good enough. Reddy instructed the ED physicians to increase their
19 admission rate. When the rates did not increase enough, Reddy met with the hospital's
20 ED Director and told him that the rate needed to increase to 25 to 30%. The ED Director
21 proposed to draft an email to the ED physicians to memorialize the 25 to 30% quota for
22 inpatient admission. Reddy immediately admonished the ED Director in the presence of
23 another physician, warning that if the ED Director put that in writing Prime could be
24 sued.

25 72. Despite such attempts by Reddy to prevent anyone from reducing Prime's
26 arbitrary ED admission quotas to writing, the quotas were communicated to ED
27
28

1 physicians through email communications, during ED meetings and in regular ED
2 reports distributed to management at all Defendant Hospitals.

3 *b. Prime Used Admission Statistics to Monitor and Enforce*
4 *Compliance with the Quotas.*

5 73. Reddy, Prime and ED Directors routinely reviewed ED admission statistics
6 to assess compliance with Prime's admission quotas. Admissions of Medicare
7 beneficiaries was one of the statistics that Prime tracked and reviewed.

8 74. In or before 2007, Prime's Vice President of Nursing and Clinical
9 Operations was responsible for creating weekly, monthly and yearly ED statistical
10 reports, referred to as "report cards" or "Prime Healthcare Services Emergency
11 Dashboards."

12 75. The hospital report cards contained data on the number of patients admitted
13 from the ED for that week/month, the number of admissions to the Intensive Care Unit,
14 the number of uninsured admissions, and the total percentage of ED patients who were
15 admitted as inpatients for each Prime hospital.

16 76. Reddy personally reviewed the hospital report cards before their circulation
17 to Prime management and hospital ED Directors.

18 77. Reddy and Prime management used the hospital report cards as a tool to
19 monitor whether the Defendant Hospitals were meeting Prime's admission quotas. If a
20 hospital's admission percentages fell below the target, Reddy would alert hospital
21 management and arrange a meeting with the ED Director and/or the ED physicians who
22 were perceived as not complying with Prime's admission policies.

23 78. The hospital report cards categorized hospitals that were meeting Prime's
24 admission quota of 20-30% by highlighting the hospital in yellow as "best practices."
25 For any hospital that fell below Prime's admission quota, the report card highlighted it in
26 red and categorized it as "needs improvement."

27 ///

1 79. For example, Defendants Montclair Hospital Medical Center and Desert
2 Valley Hospital admitted roughly 17% of their ED census in February 2007 and were
3 highlighted in red and categorized as “needs improvement.”

4 80. Hospitals with high admission percentages were praised. For example,
5 according to the February 2007 hospital report card, Defendant Sherman Oaks Hospital
6 admitted 27.9% of its ED census and was highlighted in yellow and categorized as
7 having “best practices.” ED physicians saw that Reddy and Prime were not satisfied
8 unless a hospital’s admission rate reached 25-30% of its ED Census. For example,
9 Defendants Huntington Beach Hospital, La Palma Intercommunity Hospital and West
10 Anaheim Medical Center admitted approximately 21-23.8% of their ED census in
11 February 2007. Prime did not recognize their admission percentage as falling within the
12 “best practices” category.

13 *c. ED Directors and Physicians Felt Pressure to Increase*
14 *Admissions to Meet Defendants’ Quotas.*

15 81. Internal communications reveal that ED directors and physicians responded
16 to Defendants’ efforts to pressure them to admit more insured patients and fewer
17 uninsured ones. In October 2008, for example, an ED director emailed physicians at
18 Defendant Encino Hospital to thank them for their hard work in increasing admissions
19 through the ED. “We are maintaining an appropriately high admissions percentage *in*
20 *line with the expectations of Prime Healthcare.*” (Emphasis added).

21 82. Similarly, in an email to an ED physician at Defendant Encino Hospital in
22 July 2009, the ED Director urged the physician to help increase admissions. The ED
23 Director stated that, “month to date we are at our lowest admission percentage for the
24 last 3 years. We are currently admitting only 15% of our patients. While my review of
25 the daily ED logs indicate that we’re clearly doing the right things for our patients,
26 please understand that this is going to stand out to our administration. *Please keep in*
27
28

1 *mind the Prime mindset. Push admissions as necessary and have a low threshold for*
2 *admission for any insured patient (even Medi-Cal).” (Emphasis added).*

3 83. In response to the above quoted email from Defendant Encino Hospital’s
4 ED Director, an ED physician pointed out that the ED’s admission percentage would be
5 higher, but “there’s all those uninsured ones who would otherwise be admitted given
6 their diagnosis but are held due to insurance status.”

7 84. Another example of ED directors and physicians responding to the pressure
8 to admit is seen in a November 11, 2009, email that the ED Director sent to physicians
9 upon learning that admitting percentages dropped below Prime’s expectations at
10 Defendant San Dimas Community Hospital. The ED Director reminded the physicians
11 of Prime’s admission goals: “[W]e need to show that we are moving in the right
12 direction to stay out of the firing line. Our admission percentage is down the past few
13 weeks.... *I know this is a pain in the ass, but it’s the way it is and if we actually CAN get*
14 *close to their goal we’ll make more \$\$.” (Emphasis added).*

15 85. Similarly, in an August 13, 2010 email, an ED Director noted “[o]ur
16 admission percentage is slipping and we run the risk of increased scrutiny by Dr.
17 Reddy.” And ED physicians at Defendant San Dimas Community Hospital received an
18 email in September 2010 alerting them that “[o]ur % admissions is down and our
19 number of transfers is up and Dr. Reddy [is] aware of it and [is] starting to make noises
20 to admin and then to me.”

21 86. In May 2010, when Defendant Chino Valley Medical Center’s monthly
22 report card indicated a drop in admissions compared to the previous years’ statistics, the
23 ED Director advised ED physicians that Reddy was not pleased and issued an edict via
24 e-mail to “raise admissions by a couple of percentage points,” to which another ED
25 Director responded that “they will begin the process tomorrow.”

26 ///

27 ///

28

1 *d. Prime Even Monitored and Reported Admission Rates of*
2 *Individual ED Physicians.*

3 87. To ensure that each individual ED physician was doing his or her part to
4 increase admissions, Prime and the Defendant Hospitals tracked ED physician
5 performance and productivity through various reports that focused on admission
6 percentages and average length of stay and ranked the physicians using such non-clinical
7 criteria.

8 88. These reports were routinely circulated not only to ED physicians but also
9 to executives and staff at Prime hospitals.

10 89. In 2008, for example, Defendant Chino Valley Medical Center presented a
11 Physician Analysis Report that tracked ED physician admissions and a Top Ten
12 Physician Report to the hospital's Medical Executive Committee.

13 90. And in 2010, for example, Defendant Chino Valley Medical Center
14 circulated a report called ED Physician Matrix to ED physicians, requesting that they
15 review their statistics, especially those physicians who fell below the admitting average
16 of 17%.

17 **3. Reddy Personally Reviewed ED Logs for "Missed Admissions"**
18 **and Confronted ED Physicians With Them.**

19 91. Reddy, along with other Prime executives and ED directors, reviewed ED
20 patient census logs to determine if physicians had passed up opportunities to admit
21 Medicare beneficiaries to the hospital as inpatients. The ED logs included, among other
22 things, each ED patient's name, gender, age, mode of transportation to the ED, insurance
23 status, and the name of ED physician who saw the patient.

24 92. Reddy taught Prime management -- including some individuals who had no
25 medical training -- and ED Directors how to scour the ED logs for "missed admissions."
26 But Reddy himself personally reviewed ED logs from the Defendant Hospitals on a
27 regular basis.

1 93. Reddy would circle as “missed admissions” the insured patients that he felt
2 could have been admitted to the hospital. He then circulated his marked-up logs to each
3 hospital ED Director. The ED Director was tasked with tracking down the physician to
4 discuss each discharge Reddy questioned and get the physician’s justification for not
5 admitting an insured patient. Many times, Reddy personally spoke with an ED physician
6 who discharged a Medicare beneficiary to “educate” him about the reasons why the
7 patient should have been admitted.

8 *a. ED Directors and Physicians Were Troubled By Reddy’s ED*
9 *Log Reviews and Their Ramifications.*

10 94. Many ED physicians were troubled by Reddy’s practice of reviewing ED
11 logs and the feedback they received from Reddy as a result of it. Reddy’s feedback often
12 involved second-guessing the medical judgment of the ED physicians as to whether to
13 admit or discharge an insured patient. Several ED Physicians concluded that the ED log
14 reviews were intended to interfere with and alter their clinical judgment in favor of
15 admitting more Medicare beneficiaries and other insured patients to increase
16 reimbursements to Defendants. Some questioned Reddy’s qualifications to conduct such
17 reviews, given that he had trained to be a cardiologist, not an ED physician. Physicians
18 reported feeling pressured and browbeaten by Reddy and ED Directors over the “missed
19 admissions.”

20 95. The quest to identify “missed admissions” turned, at times, into sport. An
21 email from a former Prime executive to an ED Director proposed a wager of two bottles
22 of wine against two tickets to a professional basketball game if the ED Director
23 identified 30 additional patients discharged during the month of May 2008 that could
24 have been admitted.

25 96. But pressure to avoid “missed admissions” was also applied in other, less
26 sporting ways. In January 2009, for example, an ED log review for Defendant Montclair
27 Hospital Medical Center flagged certain patients that Prime management concluded
28

1 could have been admitted. The ED physician defended his decisions, stating that “none
2 of the patients had a medical condition requiring admission.” The ED Director
3 continued to press the issue, but the physician insisted that “these patients did not have
4 final diagnosis that required admission.”

5 97. A month later, on February 1, 2009, the same physician was questioned
6 again about his decision not to admit a patient, this time a 72-year-old Medicare
7 beneficiary who presented with chest pain. In an email exchange with the ED Director,
8 the physician concluded that “they would have to agree to disagree.” The ED Director
9 then emailed another physician stating that the physician who stood his ground is not
10 “interested or [doesn’t] care[] [about] the goals we are trying to achieve.”

11 98. At Defendant Shasta Regional Medical Center, Prime even resorted to
12 posting the ED patient log containing Reddy’s highlights of missed Medicare admissions
13 in plain view on the door of the physician lounge.

14 99. Some ED Directors expressed frustration with the constant pressure to
15 admit patients with minor ailments and with Reddy’s constant oversight and scrutiny of
16 the medical judgment of the physicians. An ED Director claimed that he would start
17 circling his own census report so Reddy “won’t find the need to circle every cold and
18 kidney stone.” Another ED Director complained that Reddy “now wants to admit Otitis
19 Externa and Cystitis.” Otitis Externa is the medical term for an ear infection. Cystitis is
20 the medical term for simple urine infection. Yet another expressed concern in 2008,
21 after reviewing an ED log that included Reddy’s circles on patients with “colds, back
22 pains and simple UTI’s and simple gastroenteritis,” that Reddy wanted to meet with the
23 physicians to “scare the crap into the group.”

24 100. Physicians saw firsthand the consequences to patients of the pressure to
25 admit that Prime applied to ED Directors and physicians. In April 2009, for example,
26 when management questioned a physician’s decisions to discharge two elderly patients,
27 the physician explained in an email that “we really cannot admit patients for minor
28

1 medical problems related to delays in lab and x-ray.” The physician reported that
2 patients had complained of being admitted for no reason and that others had stated that
3 “when they were admitted, nothing was done for them.”

4 *b. Physicians Who Caused “Missed Admissions” Were Criticized*
5 *and In Jeopardy Of Losing Their Jobs.*

6 101. Reddy and Prime targeted low admitters and threatened to have them taken
7 off the ED work schedule. In January 2009, for example, Reddy emailed an ED
8 Director and remarked that a certain physician “does not fit in this model as he continues
9 to have problems with admitting patients to the hospital for work up rather than working
10 them up completely in the ER.”

11 102. Similarly, on December 19, 2008, the Chief Medical Officer at Chino
12 Valley Medical Center emailed an ED Director to complain about a physician: “[H]e
13 sent away a Medicare admission ... Get rid of this guy he does not fit in here.”

14 103. And at Defendant Shasta Regional Medical Center, Prime management
15 singled out certain doctors as candidates for termination because they sent too many
16 Medicare and Medi-Cal patients home when, in Prime’s view, they could have admitted
17 them to the hospital.

18 **4. Prime “Doctored” Widely Used Admission Criteria to Make**
19 **Inpatient Admission More Likely.**

20 104. Milliman Care Guidelines, LLC, (MCG) is a Seattle-based company that
21 independently develops, produces and sells evidence-based clinical guidelines and
22 software that are updated annually (Milliman Guidelines). MCG promotes the Milliman
23 Guidelines as a tool for “avoiding underuse or overuse of medical resources” and as a
24 shared point of reference for providers and health plans when discussing medical
25 necessity and coverage.

26 105. The Milliman Guidelines encompass several different sets of guidelines that
27 address different stages along the continuum of care, including, among others,
28

1 Ambulatory Care (which pertains to outpatient care), Inpatient & Surgical Care and
2 Multiple Condition Management.

3 106. Health care providers across the county, including hospitals, use the
4 Milliman Guidelines to inform and document clinical decision-making about, among
5 other things, medical necessity and level of care. Public and private health insurers use
6 them, too. For example, CMS specifies that the Milliman Guidelines or other screening
7 tools should be used by Quality Improvement Organizations (QIOs) and Medicare
8 Administrative Contractors (MACs). These organizations are government contractors
9 that perform Medicare healthcare quality and utilization reviews. QIOs work to improve
10 the quality of beneficiary care, and QIOs and MACs oversee inpatient hospital payment
11 reviews.

12 *a. Prime Chose the Milliman Guidelines Because It Perceived*
13 *Them As More Lenient Than the Alternative.*

14 107. On January 24, 2009, Prime’s Director of Reimbursement Management,
15 Ajith Kumar, told other members of Prime management in an email that Prime would
16 soon begin to contract with MCG in order “to use Milliman Care [] Guidelines as a
17 standard reference for inpatient admission criteria and other standards of care.” He
18 further stated that the Milliman Guidelines “will be the guidelines that we use to defend
19 our admissions to [government auditors] or any other entity.”

20 108. Kumar acknowledged in that email that Prime was choosing to subscribe to
21 the Milliman Guidelines over those published by a competitor known as Interqual.
22 Kumar stated that, because Interqual’s guidelines are produced “for insurance
23 companies, the criteria of inpatient admission are too stringent and inpatient admissions
24 are easily denied.”

25 109. Kumar further stated that “[w]e will not be able to defend more than half of
26 our admissions if we use Interqual.”
27
28

1 110. Reddy evidently shared Kumar’s view that the Milliman Guidelines would
2 help Prime increase inpatient admissions. The founder and chief executive officer of
3 Emergent Medical Associates described in a February 9, 2009, email a lecture by Reddy
4 that he had attended the night before. During the lecture, Reddy, in the attendee’s words,
5 “referenced upon many occasions Mill[i]m[a]n as being more liberal and better for
6 Prime.” Emergent Medical Associates provides ED doctors that staff the EDs at several
7 Prime hospitals in southern California.

8 *b. Prime Altered the Milliman Guidelines to Make Inpatient*
9 *Admission More Likely.*

10 Even the less “stringent,” “more liberal” Milliman Guidelines were not lenient
11 enough to satisfy Prime. Prime systematically altered the Milliman Guidelines before
12 making them available for use in hospitals Prime operates in California. The alterations
13 took different forms. But the alterations consistently made inpatient admission more
14 likely.

15 111. In some instances, Prime omitted information from the Milliman
16 Guidelines, including but not limited to criteria pertaining to less costly alternatives to
17 inpatient admission. For example, the Milliman Guidelines for Abdominal Pain and
18 Chest Pain each includes a set of “Alternatives to Admission.” Prime’s medical record
19 for an inpatient admission of a Medicare beneficiary in June 2008 to Defendant Chino
20 Valley Medical Center included a set of guidelines pertaining to abdominal pain that
21 largely tracked the corresponding Milliman Guideline, M05, but entirely omitted the
22 “Alternatives to Admission.” Those “Alternatives to Admission,” had Prime not deleted
23 them, would have included treatment and evaluation protocols that could be carried out
24 as “[o]utpatient care in emergency department, rapid treatment site, urgent care center, or
25 medical office” as well as “[o]bservation” and “[h]ome care.”

26 112. Similarly, the medical record of a Medicare beneficiary admitted on July
27 28, 2009, to Defendant West Anaheim Medical Center included a set of guidelines
28

1 pertaining to chest pain that largely tracked the corresponding Milliman Guideline, M-
2 89, but entirely omitted the “Alternatives to Admission,” which included treatment and
3 evaluation protocols that could be carried out in an “[e]mergency department, chest pain
4 center or rapid treatment site”

5 113. That same set of guidelines also expanded one of the criteria that Milliman
6 Guideline M89 identifies as supporting admission. Milliman Guideline M89 identifies
7 the “[i]nability to perform evaluation of a patient with possible A[cute] C[oronary]
8 S[yn]drome] . . . in the emergency department, chest pain center or other location capable
9 of performing patient observation and evaluation” as a criteria supporting inpatient
10 admission. But the guidelines found in the record of the July 28, 2009, admission
11 narrow the potential evaluation sites to only “the emergency department,” deleting
12 “chest pain center or other location capable of performing patient observation and
13 evaluation” as options. When coupled with Reddy’s directive that insured patients
14 should be allowed to remain in the ED no more than two hours before being admitted as
15 an inpatient, this alteration significantly increased the likelihood of inpatient admission
16 for Medicare beneficiaries presenting to the ED with chest pain.

17 114. Similarly, the medical record of a Medicare beneficiary admitted on March
18 22, 2012, to Alvarado Hospital Medical Center included a set of guidelines pertaining to
19 inpatient admission for cellulitis -- a bacterial infection of the skin and tissues beneath it
20 -- that largely tracked the corresponding Milliman Guideline, M70. The guidelines in
21 the record entirely omitted the Milliman Guideline’s “Alternatives to Admission.” And
22 the guidelines in the record also excluded from M70 the definition of “[s]evere pain
23 requiring acute inpatient management,” which is defined in the Milliman Guideline as
24 being both “[c]ontinuous and frequent (e.g. every 2 to 4 hours parenteral analgesics
25 required)” and having an expectation of “[r]apid improvement . . . from treatment or
26 acute intervention (e.g. surgery, anesthesia procedure).” By removing alternatives to
27
28

1 inpatient admission and leaving the term “severe” open to interpretation, Prime’s altered
2 guidelines made inpatient admission for cellulitis more likely.

3 115. In other instances, Prime added criteria beyond those identified in the
4 corresponding Milliman Guideline as sufficient to justify inpatient admission. In
5 guidelines for abdominal pain, chest pain, transient ischemic attack and renal failure
6 found in medical records of Medicare beneficiaries, for example, Prime had added an
7 entirely open-ended admission criteria of “Other” that was not included in the
8 corresponding Milliman Guidelines, M05, M89, M360 and M325, respectively. And
9 Prime added at least three additional criteria supporting inpatient admission for chest
10 pain that are not found in the corresponding Milliman Guideline, M89: “significant
11 E[lectrocardiogram] change,” “hemodynamic abnormality,” and “left bundle branch
12 block.”

13 *c. Prime Misled Physicians and Regulators Into Believing the*
14 *Guidelines Used at Prime Hospitals Were Authentic Milliman*
15 *Guidelines.*

16 116. Prime was contractually obligated under its license agreement with MCG to
17 include a disclosure on the face of any Milliman Guideline that Prime modified. Most or
18 all of the altered guidelines included the statement that “[p]ortions of the [Milliman
19 Guidelines] content which have been revised are identified through the use of italic text.”
20 But Prime rarely, if ever, actually followed through to call out, via italics or otherwise,
21 the alterations and omissions it made.

22 117. In so doing, Prime caused its physicians, staff and auditors to believe that
23 the guidelines Prime supplied were the same standards relied upon by other hospitals and
24 by insurers throughout the United States. They were not.

25 118. Reddy testified under oath in 2014 that “[i]t would be illegal” to alter the
26 Milliman Guidelines and then disseminate them for use in Prime hospitals.

27 ///

1 119. And when challenged by CMS on the medical necessity of an inpatient
2 admission, Prime expressly assured CMS that inpatient admission was “justified . . .
3 using industry standard guidelines,” because “[t]he physician . . . used Milliman Care
4 Guidelines . . . , which are well-accepted admission guidelines, to assist in his/her
5 decision.”

6 120. Prime has exploited the existence and acceptance of “industry standard
7 guidelines” to not only stack the deck in favor of inpatient admission but also conceal
8 from regulators and others who questioned Prime’s tactics Prime’s commitment to
9 maximizing its return on every patient without regard to widely accepted standards of
10 medical necessity.

11 **5. Prime’s Business Model Infected Its Appeals to Administrative**
12 **Law Judges.**

13 121. Reddy often assured physicians that they did not need to worry about
14 having their inpatient admission decisions overturned by Medicare contractors such as
15 MACs and RACs. Reddy and Kumar advised physicians that Prime had adopted an
16 aggressive strategy that involved appealing all denials of payment for inpatient hospital
17 services.

18 122. During a meeting in 2011, Reddy coached physicians on how to embellish
19 patient medical records to make it appear that patients were sicker than they actually
20 were and therefore, their admissions were justified. Reddy told physicians that when
21 they were admitting, they should always try to put something in the medical record that
22 embellished the reasons for admission. Reddy specifically explained that the reason to do
23 this was to persuade an administrative law judge (ALJ) who would decide the appeal of
24 any claim that was denied.

25 123. Reddy was referring to ALJs employed by the Office of Medicare Hearing
26 and Appeals (OMHA), who review claim denials of Medicare claims. ALJs are trained
27 as attorneys, and do not typically have a medical background.

1 124. Reddy often told physicians that whatever they included in the medical
2 records would eventually be viewed by an ALJ and joked that physicians could easily
3 fool the ALJ by documenting several co-existing conditions to make the patient's
4 condition seem more grave and complex. For example, during a 2012 meeting with
5 physicians, Prime executives and medical personnel at Alvarado Hospital, Reddy
6 described how physicians could mislead an ALJ by documenting several comorbid
7 conditions that were not relevant to the admission to make the patient's condition appear
8 more complex.

9 **6. Defendants' Knowledge of Their Submission of False Claims and**
10 **False Certifications**

11 125. At all times pertinent to this complaint, Defendants were aware of CMS'
12 guidance regarding when Medicare payment for an inpatient admission was appropriate,
13 and when to bill Medicare for observation services. Defendants were aware that nursing
14 and medical care and diagnostic testing can be provided and billed as observation
15 services when needed to determine whether a Medicare beneficiary's condition required
16 inpatient admission instead of admitting a beneficiary whenever evaluation of her
17 condition would take longer than an ED visit.

18 126. Defendants submitted claims to Medicare on Form UB-92 HCFA-1450 and
19 Form UB-04 CMS-1450. For inpatient services Defendant Hospitals submitted an
20 inpatient claim form (Type of Bill 11X). For observation services Defendant Hospitals
21 should have submitted an outpatient claim form (Type of Bill 13X).

22 127. Each claim form contains an express certification by the provider. For
23 example, claims submitted on Form UB-04 CMS-1450, the hospital contain an express
24 certification that, among other things:

25 "the billing information as shown on the face hereof is true, accurate and
26 complete";

27 and
28

1 “the submitter did not knowingly or recklessly disregard or misrepresent or
2 conceal material facts.”

3 128. Defendants knew that it was material to Medicare’s decision to pay
4 inpatient claims whether inpatient services were reasonable and necessary for the
5 patient’s health, as opposed to observation services, as well as whether inpatient services
6 were provided.

7 129. Defendants knew that to bill Medicare for observation services they should
8 submit an outpatient claim (Type of Bill 13X) listing the appropriate HCPCS codes that
9 map to an APC for the care that was furnished to the patient instead of billing on an
10 inpatient claim form (Type of Bill 11X).

11 130. By submitting inpatient claim forms using ICD-9-CM codes that map to a
12 DRG that are used exclusively for inpatient admissions that they were representing to
13 Medicare that the patient required inpatient admission.

14 131. Defendants knew that they submitted inpatient claims to Medicare using
15 ICD-9-CM codes that map to a DRG representing that inpatient admission was necessary
16 and that inpatient services were provided for patients who did not require inpatient
17 admission and who either (a) received only observation services; or (b) who received
18 medically unnecessary inpatient services.

19 132. Defendants chose to not order or bill for observation services when they
20 were clinically appropriate for financial reasons. As a foreseeable consequence of this
21 decision, Defendants submitted false claims to Medicare for higher-paid inpatient
22 admissions when only observation services were provided to beneficiaries. The
23 certifications on each such claim that the billing information was true, accurate and
24 complete, and that “the submitter did not knowingly or recklessly disregard or
25 misrepresent or conceal material facts” were false because the patient’s medical
26 condition did not require inpatient admission and the care actually provided was
27 consistent with observation services or treatment.

1 133. In addition to the interim patient-specific claim payments, hospitals are
2 required to annually submit a Medicare Cost Report. The Medicare Cost Report
3 determines a provider’s Medicare reimbursable costs for a fiscal year. 42 U.S.C. §
4 1395g(a); 42 C.F.R. §413.20. The cost report is the provider’s final claim for payment
5 from the Medicare program for the services rendered to all program beneficiaries for a
6 fiscal year. Medicare relies on the Medicare Cost Report to determine whether the
7 provider is entitled to more reimbursement than already received through interim
8 payments, or whether the provider has been overpaid and must reimburse Medicare for
9 the overpayment. 42 C.F.R. §§ 405.1803, 413.60 and 413.64(f)(1).

10 134. Each Medicare Cost Report contains an express certification that must be
11 signed by the chief hospital administrator or a responsible designee of the administrator.

12 135. The Medicare Cost Report Certification, which is a preface to the cost
13 report’s certification, provides the following prominent warning:

14 **MISREPRESENTATION OR FALSIFICATION OF ANY INFORMATION**
15 **CONTAINED IN THIS COST RPEORT MAY BE PUNISHABLE BY**
16 **CRIMINAL, CIVIL AND ADMINISTRATIVE ACTION, FINE AND/OR**
17 **IMPRISONMENT UNDER FEDERAL LAW. FURTHERMORE, IF**
18 **SERVICES IDENTIFIED IN THIS REPORT WERE PROVIDED OR**
19 **PROCURED THROUGH THE PAYMENT DIRECTLY OR INDIRECTLY**
20 **OF A KICKBACK OR WERE OTHERWISE ILLEGAL, CRIMINAL,**
21 **CIVIL AND ADMINISTRATIVE ACTION, FINES, AND/OR**
22 **IMPRISONMENT MAY RESULT.**

23 This advisory is followed by the actual certification language itself:

24 **CERTIFICATION BY OFFICER OR ADMINISTRATOR OF PROVIDER**
25 **I HEREBY CERTIFY that I have read the above statement and that I have**
26 **examined the accompanying electronically filed or manually submitted cost**
27 **report and the Balance Sheet and Statement of Revenue and Expenses**
28 **prepared by [name of facility, ID number of facility] for the cost reporting**
 period beginning [date] and ending [date] and that to the best of my
 knowledge and belief, it is a true, correct and complete statement prepared
 from the books and records of the provider in accordance with applicable
 instructions, except as noted. I further certify that I am familiar with the
 laws and regulations regarding the provision of the health care services, and
 that the services identified in this cost report were provided in compliance
 with such laws and regulations.”

 CMS Form 2552, Medicare Cost Report.

1 136. Each Defendant Hospital executed and submitted a hospital cost report to
2 Medicare annually which contained the above-quoted certification. The certifications
3 were false in that the cost reports included inpatient days associated with paid inpatient
4 claims that should have been billed as outpatient observation services or outpatient
5 treatment, in violation of the Medicare law, regulations and Manual guidance regarding
6 billing for inpatient services.

7 137. At all times relevant to this complaint, Defendants received
8 communications and guidance from MACs and other Medicare contractors regarding
9 appropriate billing for observation and inpatient services including, but not limited to,
10 thousands of claims that were denied on either pre-pay or post-pay review.

11 138. At all times relevant to this complaint, Defendants understood and
12 disregarded Medicare laws, regulations and program instructions regarding the use of
13 observation services and the medical necessity of inpatient services.

14 139. Defendants knew that the claims and certifications that they submitted, or
15 caused to be submitted, to Medicare were false, or else deliberately ignored, and/or were
16 recklessly indifferent to, the truth or falsity of those certifications and claims.

17 **B. Defendants Submitted or Caused the Submission of Inpatient Claims**
18 **for Outpatient-Level Care or Medically Unnecessary Inpatient Care.**

19 140. Defendants have knowingly submitted or caused to be submitted false or
20 fraudulent claims to Medicare on Form UB-92 HCFA-1450 or on Form UB-04 CMS-
21 1450, with Type of Bill 11X indicated, signifying that inpatient services were provided,
22 when the hospital planned and provided only outpatient-level care. Such claims have
23 originated from each of the fourteen Defendant Hospitals. The following are illustrative
24 examples of paid claims where a review of the medical records, taken at face value,
25 indicates that the inpatient services billed to Medicare should have been billed as either
26 observation services or an ED visit.

27 ///

1 141. Defendants knowingly submitted or caused to be submitted a false or
2 fraudulent claim to Medicare for Patient A,¹ an 81-year-old Medicare beneficiary who
3 presented to Defendant Alvarado Hospital on December 24, 2010, complaining of a
4 cough and was discharged the next day. Her symptoms were consistent with chronic
5 respiratory failure and other pre-existing conditions, including chronic obstructive lung
6 disease, that were noted in the record. She had a history of reliance on supplemental
7 oxygen. She was given supplemental oxygen in the ED, which increased her oxygen
8 saturation from 91% to 97%. She was treated with an antibiotic for suspected bronchitis
9 but was discharged a day later with no instructions to continue it. Given her chronic
10 conditions, her vital signs and symptoms did not support a diagnosis of acute respiratory
11 failure necessitating interventions such as intubation or supportive ventilation, and none
12 were provided. The care the hospital planned and provided was consistent with
13 observation services. But defendants billed Medicare \$14,128.65 for an inpatient
14 admission on an inpatient type of bill for which Defendant Alvarado Hospital collected
15 \$8,112.58 from Medicare for DRG 189, which corresponds to pulmonary edema and
16 respiratory failure. This claim was false or fraudulent because Defendant Alvarado
17 Hospital's medical records for the admission demonstrate that observation services were
18 provided and should have been billed to Medicare, but defendants instead billed
19 Medicare for an unnecessary inpatient admission.

20 142. Defendants knowingly submitted or caused to be submitted a false or
21 fraudulent claim to Medicare for Patient B, a 77-year-old Medicare beneficiary who
22 presented to Defendant Encino Hospital on October 1, 2012, after fainting in a hot,
23 outdoor environment at an adult day care facility. He was discharged the next day. The
24 emergency medical technician who arrived at the hospital with Patient B reported that
25 Patient B was alert on arrival. His vital signs were normal, and no significant physical

26
27 ¹ The identities of individual Medicare beneficiaries discussed herein have been
28 withheld to protect their privacy. Their identities will be made available to Defendants.

1 findings were noted. Patient B received fluids intravenously to address mild
2 dehydration. His fainting was suspected to be due to a vasovagal episode, a common
3 condition that is mild and usually does not lead to harm or further complications. These
4 episodes are triggered by, among other things, prolonged standing, heat exposure or the
5 sight of blood. Patient B had no further episodes and was discharged the following
6 morning. His medical record includes an order to change Patient B's from an inpatient
7 to an outpatient receiving observation services that was written at the time of discharge,
8 approximately 18 hours after admission. But defendants billed Medicare \$14,116.10 for
9 an inpatient admission on an inpatient type of bill for which Defendant Encino Hospital
10 collected \$4,263.42 from Medicare for DRG 312, which corresponds to syncope and
11 collapse. This claim was false or fraudulent because Defendant Encino Hospital's
12 medical records for Patient B demonstrate recognition by the patient's treating physician
13 that observation care was provided and should be billed to Medicare, but defendants
14 instead billed Medicare for an unnecessary inpatient admission.

15 143. Defendants knowingly submitted or caused to be submitted a false or
16 fraudulent claim to Medicare for Patient C, a 71-year-old Medicare beneficiary who
17 presented to Defendant Huntington Beach Hospital on May 25, 2008, with a complaint
18 of dizziness and was sent home the next morning. On arrival, she felt nauseous and
19 lightheaded, had vomited and had a history of diabetes. In the ED, her vital signs were
20 normal and she was treated with an anti-nausea medicine. The results of her
21 electrocardiogram test, used to detect problems with the electrical activity of the heart,
22 her laboratory studies, and a computerized scan of her head were all unremarkable. She
23 was nevertheless admitted as an inpatient with a plan of care that consisted of
24 observation and evaluation with additional laboratory tests. No further diagnostic
25 studies or therapeutic interventions were planned. An inpatient admission was not
26 indicated for the brief period of observation the hospital provided to Patient C. But
27 defendants billed Medicare \$9,258.64 for an inpatient admission on an inpatient type of
28

1 bill for which Defendant Huntington Beach Hospital collected \$3,650.74 from Medicare
2 for DRG 312, which corresponds to syncope and collapse. This claim was false or
3 fraudulent because Defendant Huntington Beach Hospital's medical records for Patient
4 C demonstrate that observation services were provided and should have been billed to
5 Medicare, but defendants instead billed Medicare for an unnecessary inpatient
6 admission.

7 144. Defendants knowingly submitted or caused to be submitted a false or
8 fraudulent claim to Medicare for Patient D, a 76-year-old Medicare beneficiary who
9 presented to Defendant Sherman Oaks Hospital on July 29, 2008, with a reported
10 concern from the care facility where she lived that she had a facial droop. She had a
11 history of advanced Alzheimer's dementia and she was bedridden, confused and unable
12 to follow directions. Her vital signs were normal and her physical examination was
13 described to be at her baseline, with no evidence of a facial droop. Her laboratory
14 studies were unremarkable and a computerized scan of her head showed significant
15 atrophy in her brain. The plan of care was to discharge her back to the care facility. But
16 she was ordered put on inpatient status late in the evening on July 29, 2008. She was
17 treated with an aspirin and no further diagnostic study or therapeutic intervention was
18 planned or performed. She was discharged back to the care facility the next day. But
19 defendants billed Medicare \$7,615.85 for an inpatient admission on an inpatient type of
20 bill for which Defendant Sherman Oaks Hospital collected \$4,292.28 from Medicare for
21 DRG 069, which corresponds to transient ischemia. This claim was false or fraudulent
22 because Defendant Sherman Oaks Hospital's medical records for Patient D demonstrate
23 that observation services were provided and should have been billed to Medicare, but
24 defendants instead billed Medicare for an unnecessary inpatient admission.

25 145. Defendants knowingly submitted or caused to be submitted a false or
26 fraudulent claim to Medicare for Patient E, a 78-year-old Medicare beneficiary who
27 presented to Defendant Desert Valley Hospital on March 9, 2012, with vomiting,
28

1 diarrhea, and general weakness following a colonoscopy nine days prior. The ED doctor
2 stated she was in “no apparent distress” and had normal bowel sounds and made no
3 mention of abdominal tenderness. She had no fever. An elevated blood pressure of
4 203/107 was noted at the time of the hospital’s triage assessment, but subsequent
5 readings were lower, ranging from 126-144 over 83-99. She was treated with broad-
6 spectrum antibiotics for possible early pneumonia and a chest x-ray was performed. By
7 the following morning, a progress note stated that all symptoms had resolved. An order
8 for discharge was written approximately 24 hours after her arrival in the ED, with a
9 discharge diagnosis of viral gastroenteritis, also known as the stomach flu. The care the
10 hospital planned and provided was consistent with observation services. But defendants
11 billed Medicare \$10,444.78 for an inpatient admission on an inpatient type of bill for
12 which Defendant Desert Valley Hospital collected \$3,980.62 from Medicare for DRG
13 392, which corresponds to esophagitis, gastroenteritis and miscellaneous digestive
14 disorders. This claim was false or fraudulent because Defendant Desert Valley
15 Hospital’s medical records for Patient E demonstrate that observation services were
16 provided and should have been billed to Medicare, but defendants instead billed
17 Medicare for an unnecessary inpatient admission.

18 146. Defendants knowingly submitted or caused to be submitted a false or
19 fraudulent claim to Medicare for Patient F, a 64-year-old Medicare beneficiary who
20 presented to Defendant Paradise Valley Hospital on September 12, 2007, and was
21 discharged the next day. She complained of a two-day history of vertigo, which is a loss
22 of balance or spinning sensations, with headache, similar to other headaches she had
23 previously experienced. Her medical history included high blood pressure,
24 cardiomyopathy, anxiety, and depression. There were no significant findings in the ED.
25 The admitting doctor noted that Patient F had been seen multiple times for similar
26 symptoms. Her vertigo was described on the admission note as resolved. The plan of
27 care was to continue to observe Patient F for 12 to 24 hours. But defendants billed
28

1 Medicare \$9,184.16 for an inpatient admission on an inpatient type of bill and Defendant
2 Paradise Valley Hospital collected \$5,166.41 from Medicare for DRG 065, which
3 corresponds to disequilibrium. This claim was false or fraudulent because Defendant
4 Paradise Valley Hospital's medical records for Patient F demonstrate that observation
5 services were provided and should have been billed to Medicare, but defendants instead
6 billed Medicare for an unnecessary inpatient admission.

7 147. Defendants knowingly submitted or caused to be submitted a false or
8 fraudulent claim to Medicare for Patient G, a 74-year-old Medicare beneficiary who
9 presented to Defendant Garden Grove Medical Center on April 20, 2009, and was
10 discharged the next day. She complained of abdominal pain and weakness. She had
11 been admitted to the hospital and evaluated for chest pain and abdominal pain earlier in
12 the same month. At that time, she had undergone a computerized scan of the abdomen
13 and pelvis, an endoscopy and a stress test. On April 20, 2009, her vital signs were
14 unremarkable, she had no fever and her abdominal examination showed only mild
15 tenderness. Her laboratory studies were unremarkable. She did not require pain
16 medication and was treated with an anti-acid medication. Her abdominal discomfort was
17 assessed to be "nonspecific" and her plan of care consisted only of a colonoscopy and
18 discharge. Colonoscopies are routinely performed on an outpatient basis. Neither
19 inpatient admission nor even observation services were necessary to complete a
20 colonoscopy for an otherwise stable patient like Patient G. But defendants billed
21 Medicare \$13,407.04 for an inpatient admission on an inpatient type of bill for which
22 Defendant Garden Grove Medical Center collected \$6,642.43 from Medicare for DRG
23 392, which corresponds to esophagitis, gastroenteritis and miscellaneous digestive
24 disorders. This claim was false or fraudulent because Defendant Garden Grove Medical
25 Center's medical records for Patient G demonstrate that an ED visit was all that should
26 have been provided and billed to Medicare, but defendants instead billed Medicare for an
27 unnecessary inpatient admission, including medically unnecessary services.

1 148. Defendants knowingly submitted or caused to be submitted a false or
2 fraudulent claim to Medicare for Patient H, an 84-year-old Medicare beneficiary who
3 presented to Defendant Centinela Hospital Medical Center on March 8, 2011, with a
4 complaint of intermittent chest pain lasting two days. She was discharged the next day.
5 She had a history of diabetes and hypertension, but she was not tachycardic or
6 hypertensive – i.e., her heart was not racing and her blood pressure was not elevated.
7 Her oxygenation and respiratory rate were normal and her vital signs were stable. An
8 electrocardiogram and cardiac enzyme test were performed. A cardiologist examined
9 her and concluded that the pain was pleuritic, a condition that involves inflammation of
10 the tissue lining the lungs and inner chest wall and can cause chest pain, because it
11 worsened with breathing. Her signs and symptoms upon presentation, together with the
12 stated plan of care – evaluation by a cardiologist -- were predictive of a short hospital
13 stay and did not require an inpatient admission. But defendants billed Medicare
14 \$22,502.71 for an inpatient admission on an inpatient type of bill and Defendant
15 Centinela Hospital Medical Center collected \$5,074.07 from Medicare for DRG 392,
16 which corresponds to esophagitis, gastroenteritis and miscellaneous digestive disorders.
17 This claim was false or fraudulent because Defendant Centinela Hospital Medical
18 Center’s medical records for Patient H demonstrate that observation services were
19 provided and should have been billed to Medicare, but defendants instead billed
20 Medicare for an unnecessary inpatient admission.

21 149. Defendants knowingly submitted or caused to be submitted a false or
22 fraudulent claim to Medicare for Patient I, a 50-year-old Medicare beneficiary who
23 presented to the ED at Defendant West Anaheim Medical Center on July 28, 2009,
24 complaining of chest pain that developed while she was seated in her car. She had a
25 history of diabetes mellitus, chronic obstructive pulmonary disease, and use of
26 methamphetamine, cocaine, and tobacco. In the ED, her vital signs were unremarkable.
27 An electrocardiogram performed there was unchanged versus her prior cardiology
28

1 evaluations that found no cardiac disease. Her toxicology screen was positive for
2 methamphetamine. She was treated in the ED with nitroglycerin and aspirin. She was
3 nevertheless admitted, with a plan of care that consisted of continuing her home
4 medications, completing an additional cardiac marker and obtaining a cardiology
5 consultation. No additional therapeutic interventions were planned or provided. Her
6 cardiologist saw her the next day and, because she already had a scheduled outpatient
7 cardiology evaluation, no further diagnostic study was pursued. She was discharged on
8 July 30, 2009. Her presenting signs and symptoms and her plan of care were predictive
9 of a short hospital stay that did not require an inpatient admission. But defendants billed
10 Medicare \$11,808.56 for an inpatient admission on an inpatient type of bill and
11 Defendant West Anaheim Medical Center collected \$3,997.01 from Medicare for DRG
12 313, which corresponds to chest pain. This claim was false or fraudulent because
13 Defendant West Anaheim Medical Center's medical records for Patient I demonstrate
14 that observation services were provided, and were the most that should have been billed
15 to Medicare, but instead Defendant West Anaheim Medical Center admitted Patient I,
16 provided medically unnecessary services, and billed Medicare for an unnecessary
17 inpatient admission.

18 150. Defendants knowingly submitted or caused to be submitted a false or
19 fraudulent claim to Medicare for Patient J, an 88-year-old Medicare beneficiary who
20 presented to Defendant La Palma Intercommunity Hospital on April 16, 2008. He
21 presented to the ED hours after he was discharged to a nursing home from a six-day stay
22 at the same hospital for treatment of pneumonia and pulmonary embolism, a blood clot
23 in the lungs. On returning to the hospital, he complained of chest pain. There were no
24 acute cardiopulmonary findings on examination, and the oxygenation of his blood was
25 an unremarkable 95% on room air, without supplemental oxygen. On evaluation, both
26 the pulmonologist and the cardiologist who examined him indicated that the symptoms
27 were unlikely to be related to coronary disease and that a pulmonary origin was
28

1 suspected. He was discharged the following day to a nursing home. When a patient is
2 readmitted to the same hospital on the same day for a related condition, the Medicare
3 Claims Processing Manual directs the hospital to combine the charges into one hospital
4 claim rather than create a new claim. But defendants billed Medicare \$46,342.54 for the
5 April 10, 2008 six day inpatient admission, and \$10,937.22 for a second inpatient
6 admission for the April 16, 2008 readmission and overnight stay. Defendant La Palma
7 Intercommunity Hospital collected \$10,441.67 for April 10, 2008 admission for DRG
8 175, which corresponds to pulmonary embolism, and \$4,447.08 for the overnight April
9 16, 2008, admission for DRG 313, which corresponds to chest pain. The latter claim
10 was false or fraudulent because Defendant La Palma Intercommunity Hospital's medical
11 records for Patient J demonstrate that only observation services were provided and, in
12 any event, the patient's continued care on April 16, 2008 was directly related to the
13 condition present at discharge earlier that day and, therefore, was not eligible to be billed
14 and paid as a separate inpatient admission.

15 151. Defendants knowingly submitted or caused to be submitted a false or
16 fraudulent claim to Medicare for Patient K, a 73-year-old Medicare beneficiary who
17 presented to Defendant Chino Valley Medical Center on April 26, 2012, after fainting.
18 She had recently been evaluated in an urgent care for nausea and diarrhea and was
19 standing in line to pick up her medication when she lost consciousness, fell backward
20 and was caught by a bystander. In the ED, she had no fever and her vital signs were
21 stable. Her abdominal examination and electrocardiogram were unremarkable and her
22 laboratory studies were normal. She was given intravenous fluids. A neurologist who
23 saw her the day she presented concluded the fainting resulted from her nausea and
24 diarrhea. Her gastrointestinal symptoms were attributed to gastroenteritis, also known
25 as the stomach flu. By the next day, April 27, 2012, Patient K was described as feeling
26 better. She was discharged on April 28, 2013. Inpatient services for an episode of
27 fainting were unnecessary in the absence of an underlying cardiac, neurologic or other
28

1 serious condition. But defendants billed Medicare \$27,302.41 for an inpatient admission
2 on an inpatient type of bill and Defendant Chino Valley Medical Center collected
3 \$4,393.77 from Medicare for DRG 641, which corresponds to nutritional and
4 miscellaneous metabolic disorders. This claim was false or fraudulent because
5 Defendant Chino Valley Medical Center's medical records for Patient K demonstrate
6 that observation services provided and should have been billed to Medicare, but
7 defendants instead billed Medicare for an unnecessary inpatient admission.

8 152. Defendants knowingly submitted or caused to be submitted a false or
9 fraudulent claim to Medicare for Patient L, a 65-year-old Medicare beneficiary who
10 presented to Defendant San Dimas Community Hospital on March 16, 2013, with
11 uncontrolled hypertension, or high blood pressure, and a headache. She had a history of
12 hypertension and had been previously evaluated for headache. Her blood pressure was
13 elevated on arrival and came down after she received an oral anti-hypertensive medicine
14 in the ED. She was nevertheless admitted during the early morning hours on March 17,
15 2013. A cardiologist who examined her recommended discharge once her headache was
16 controlled. She presented with no neurologic deficits but was evaluated with an MRI of
17 the head and carotid Doppler studies. Neither showed any acute pathology. She was
18 discharged on March 18, 2013. An inpatient admission was not required to control her
19 blood pressure with oral anti-hypertensive medicine or to treat her headache with
20 analgesics. But Prime billed Medicare \$28,796.25 for an inpatient admission on an
21 inpatient type of bill and Defendant San Dimas Community Hospital collected \$3,233.27
22 from Medicare for DRG 305, which corresponds to hypertension . This claim was false
23 or fraudulent because Defendant San Dimas Community Hospital's medical records for
24 Patient L demonstrate that observation services were provided and should have been
25 billed to Medicare, but defendants instead billed Medicare for an unnecessary inpatient
26 admission.

1 153. Defendants knowingly submitted or caused to be submitted a false or
2 fraudulent claim to Medicare for Patient M, a 45-year-old Medicare beneficiary who
3 presented to Defendant Montclair Hospital on December 27, 2008 and was discharged
4 two days later, on December 29, 2008. She complained of sharp left-sided chest pain
5 while eating. She reported dizziness and vomiting several hours prior to experiencing
6 chest pain. She had a history of diabetes, hypertension, anxiety, and depression. Her
7 white blood cell count was elevated and the ED reported a rapid heart rate, or
8 tachycardia, with a rate of 108. After receiving medicine orally, her blood pressure
9 decreased and then returned to normal. The cardiologist who examined Patient M noted
10 complete resolution of her symptoms. Her signs and symptoms upon presentation,
11 together with the stated plan of care – examination by a cardiologist -- were predictive of
12 a short hospital stay and did not require an inpatient admission. But defendants billed
13 Medicare \$14,051.92 for an inpatient admission on an inpatient type of bill and
14 Defendant Montclair Hospital collected \$3,760.63 from Medicare for DRG 313, which
15 corresponds to chest pain. This claim was false or fraudulent because Defendant
16 Montclair Hospital's medical records for Patient M demonstrate that observation
17 services were provided and should have been billed to Medicare, but defendants instead
18 billed Medicare for an unnecessary inpatient admission.

19 154. Defendants knowingly submitted or caused to be submitted a false or
20 fraudulent claim to Medicare for Patient N, an 80-year-old Medicare beneficiary who
21 presented to Defendant Shasta Regional Medical Center on March 2, 2010, and was
22 discharged the next day. She presented with complaints of flushing, nausea, sweating,
23 shortness of breath and dizziness. Her past medical history was unremarkable. She was
24 described as being in no distress, with a mild elevation of her blood pressure. Her
25 oxygen saturation was reported to have been normal (100%) and her electrocardiogram
26 did not demonstrate any acute cardiac changes or evidence of an irregular heartbeat. She
27 was hospitalized with a diagnosis of dizziness, lightheadedness and shortness of breath
28

1 suspected to be due to a viral syndrome. At the time of her admission, Patient N had
2 normal vital signs and no fever. She did not have objective findings of cardiac,
3 neurologic or infectious disease. The additional diagnostic studies that were completed
4 and the treatment she received – administration of anti-anxiety medicine -- did not
5 require an inpatient admission. But defendants billed Medicare \$5,036.28 for an
6 inpatient admission on an inpatient type of bill and Defendant Shasta Regional Medical
7 Center collected \$3,936.28 from Medicare for DRG 312, which corresponds to syncope
8 and collapse. This claim was false or fraudulent because Defendant Shasta Regional
9 Medical Center’s medical records for Patient N demonstrate that observation services
10 were provided and should have been billed to Medicare, but defendants instead billed
11 Medicare for an unnecessary inpatient admission.

12 155. The 14 admissions described above all resulted in claims to Medicare that
13 were false because the inpatient admissions for which Prime and/or the 14 Defendant
14 Hospitals billed Medicare were medically unnecessary. Prime, Reddy and the 14
15 Defendant Hospitals submitted such claims, or caused them to be submitted, knowing
16 that Medicare does not reimburse providers for medically unnecessary services.

17 156. These fourteen claims are examples of a pattern of Prime’s hospitals in
18 California billing for inpatient services when only outpatient services were provided or
19 only outpatient services should have been provided and billed to Medicare.

20 **COUNT I**
21 **Against All Defendants**
22 **False Claims Act: Presentation of False Claims**
31 U.S.C. 3729(a)(1)(A), formerly 31 U.S.C. 3729(a)(1)

23 157. Paragraphs 1-156 are incorporated by reference as though fully set forth
24 herein.

25 158. Defendants knowingly (as “knowingly” is defined by 31 U.S.C. 3729(b)(1))
26 presented or caused to be presented false or fraudulent claims for payment or approval to
27 the United States. Specifically, Defendants knowingly submitted false claims to
28

1 Medicare on Forms UB-92 HCFA-1450, UB-04 CMS-1450, Type of Bill 11X
2 signifying an inpatient claim, and CMS-2552 for payment of medically unnecessary
3 inpatient short stay admissions that should have been classified and billed as
4 outpatient/observation cases.

5 159. By virtue of the said false or fraudulent claims, the United States incurred
6 damages and therefore is entitled to multiple damages under the False Claims Act, plus a
7 civil penalty for each violation of the Act.

8 **COUNT II**
9 **Against All Defendants**
10 **False Claims Act: Making or Using False Records or Statements**
11 **31 § U.S.C. 3729(a)(1)(B) (formerly 31 U.S.C. 3729(a)(2))**

12 160. Paragraphs 1-156 are incorporated by reference as though fully set forth
13 herein.

14 161. Defendants knowingly (as “knowingly” is defined by 31 U.S.C. 3729(b)(1))
15 made, used, or caused to be made or used, false records or statements material to false or
16 fraudulent claims paid or approved by the United States. Specifically, Defendants
17 knowingly made false statements to Medicare on Forms CMS-855A, CMS-8551, UB-92
18 HCFA-1450, UB-04 CMS-1450, Type of Bill 11X signifying an inpatient claim, and
19 CMS-2552, regarding, *inter alia*, Defendants’ compliance with Medicare requirements
20 and the accuracy of Defendants’ billing information and cost data.

21 162. By virtue of the said false records and statements, the United States incurred
22 damages.

23 **COUNT III**
24 **Against All Defendants**
25 **False Claims Act: Reverse False Claims**
26 **31 U.S.C. § 3729(a)(1)(G) (formerly 31 U.S.C. 3729(a)(7))**

27 163. Paragraphs 1-156 are incorporated by reference as though fully set forth
28 herein.

///

1 164. Defendants knowingly (as “knowingly” is defined by 31 U.S.C. 3729(b)(1))
2 made, used, or caused to be made or used, false records or statements material to an
3 obligation to pay or transmit money or property to the United States.

4 165. Defendants knowingly (as “knowingly” is defined by 31 U.S.C. 3729(b)(1))
5 concealed or improperly avoided or decreased an obligation to pay or transmit money or
6 property to the United States.

7 166. Defendants knowingly (as “knowingly” is defined by 31 U.S.C. 3729(b)(1))
8 made, used, or caused to be made or used, false records or statements to conceal, avoid
9 or decrease an obligation to pay or transmit money or property to the Government.

10 167. By virtue of the said false records, statements, or other acts of concealment,
11 the United States incurred damages.

12 **COUNT IV**
13 **Against All Defendants**
14 **Restitution (Unjust Enrichment)**

15 168. Paragraphs 1-156 are incorporated by reference as though fully set forth
16 herein.

17 169. Defendants have received money from Plaintiff United States to which
18 Defendants were not entitled, which unjustly enriched Defendants, and for which
19 Defendants must make restitution. Defendants received such money by claiming and
20 retaining Medicare payments for medically unnecessary inpatient short stay admissions
21 which should have been classified and billed as outpatient/observation cases. In equity
22 and good conscience, such money belongs to Plaintiff United States.

23 170. Plaintiff United States is entitled to recover such money or a portion of such
24 money from each defendant named in the Claim for Relief in an amount to be
25 determined at trial.

26 ///

27 ///

28 ///

COUNT V
Against Defendant Hospitals
Payment By Mistake

171. Paragraphs 1-156 are incorporated by reference as though fully set forth herein.

172. Plaintiff United States paid money to Defendants as a result of a mistaken understanding. Specifically, Plaintiff United States paid Hospitals Defendants' claims for Medicare reimbursement under the mistaken understanding that such claims were for reimbursement for medically necessary inpatient services, when in fact, they were for reimbursement for medically unnecessary inpatient short stay admissions which should have been classified and billed as outpatient/observation cases. Had Plaintiff United States known the truth, it would not have paid such claims. Payment therefore was by mistake.

173. As a result of such mistaken payments, Plaintiff United States has sustained damages for which each defendant named in the Claim for Relief in an amount to be determined at trial.

PRAYER

WHEREFORE Plaintiff United States demands judgment as follows:

a. On Counts I, II, and III (False Claims Act), against all Defendants jointly and severally, for the amount of the United States' damages, trebled as required by law, together with the maximum civil penalties allowed by law, costs, post-judgment interest, and such other and further relief as the Court may deem appropriate;

b. On Count IV (Restitution), against all Defendants jointly and severally, for an amount equal to the monies that Defendants obtained from the United States without right and by which Defendants have been unjustly enriched, plus costs, pre-and post-judgment interest, and such other and further relief as the Court may deem appropriate; and,

1 c. On Count V (Payment By Mistake), against each of the Defendant
2 Hospitals, for an amount equal to the United States' damages from each of them, plus
3 costs, pre-and post-judgment interest, and such other and further relief as the Court may
4 deem appropriate.

5 **DEMAND FOR JURY TRIAL**

6 Plaintiff United States of America hereby demands a trial by jury.

7
8 Dated: June 23, 2016

Respectfully submitted,

9 BENJAMIN C. MIZER
Principal Deputy Assistant Attorney General
